#### Proposed Heuristic:-

Basically we just gave value to different pattern .Higher value to more desirable pattern and less value to not so desirable pattern.

#### Search Strategy:-

We used Minimax algorithm with alpha beta pruning. We considered to use this because we had to modify the search to consider the aspect of bonus move and was handled easily.

#### Weakness:-

Team 58 vs 30

We didn't focus on stopping the other.

From 44vs 58

Valuation of pattern at some point is not perfect. Due to symmetry some pattern were getting 0 valuation and they were placing randomly. Big board is given very high valuation
